

# HO SOCCER - GK GLOVES CUTS

## FLAT

Traditional cut with a flat palm construction, offering a larger contact surface.

## NEGATIVE

This is a cut with internal seams, that provide a tighter fit and better contact with the ball. Also gussets are in latex, offering a larger grip area.

SPECIAL

## NEGATIVE

This exclusive cut is used in model ENIGMA gen 4. Construction is same as negative cut, but thumb has separate piece design that assist the natural hand motion.

## R-NEGATIVE

This exclusive cut is similar to negative cut with internal seams, but also latex is rolled on the tip of the fingers, offering an extra traction around them.

## ROLL FINGER

In this roll finger cut latex palm envelopes the fingers. This ensures constant ball contact and guarantees stability with the ball.

SPECIAL

## ROLL FINGER

This exclusive cut is used in model KONTROL gen 4. Construction is same as roll finger cut, but also latex expands to the wrist, that provides a larger catching area.

## SPECIAL HELIOS

In this exclusive cut, latex extends from the palm to backhand and is folded over the thumb, offering added comfort and grip.

## SPECIAL GECKO

This exclusive cut is a combination between flat and roll finger cut, that provides a tighter fit on fingers and more sensibility. The palm is extended over the wrist to give an enhanced contact area. Thumb is negative latex stitched for better contact on the ball.

## SPECIAL MGC

This exclusive cut provides a total grip area and optimized fit. Latex is folded over the thumb, index and small finger and expands to the wrist, offering a perfect adhesion when catching the ball.
